

Where the website stands

The site is built and working. What follows is what it cost, what it costs to run, and the few things still needed to put it live.

BUILT

A complete six-page website, with an editor you can run yourself.

Home, Work, Flowers, Care, Studio and project pages — plus a visual editor for changing projects, photographs, prices and contact details without a developer. Enquiries route straight to WhatsApp as a structured message, so there is no server to pay for and nothing to break.

It scores **100 out of 100** on Google's mobile checks for speed, accessibility and search readiness, and loads in about 12 KB — built for a metered Abuja connection.

WHAT WE NEED FROM YOU

THESE TWO BLOCK LAUNCH

The live WhatsApp number and email address are still placeholders, and every button on the site points at them. And the **domain name** needs confirming — we have assumed `kpomey.com`.

— Photographs

Originals from the phone or camera. Every picture on the site is a deliberate empty slot until they arrive.

— The logo

A stand-in is in place. Yours replaces it in the header, the browser icon and link previews.

— Care plan prices

All three currently read “on enquiry”. We suggest publishing a “from” price on Monthly and Fortnightly.

— Real project names, years and durations

And which projects should get their own full page — one is written, six are waiting.

— Permission to name the shooting-range client

The strongest credential on the site is currently anonymous.

OUR FEE

₦1,500,000, in three stages.

STAGE	PAYABLE	AMOUNT	STATUS
50%	On agreeing to proceed, to begin the engagement	₦750,000	DUE NOW
35%	On acceptance of the completed development	₦525,000	ON ACCEPTANCE
15%	On the site going live	₦225,000	ON LAUNCH
Total	Project fee	₦1,500,000	

The site was built ahead of this agreement so that the proposal could be shown rather than described. Development is therefore already complete, and the second stage follows the first as soon as you have reviewed and accepted the build. The final stage falls due at launch.

RUNNING COSTS

₦152,000 a year to keep the site online.

Two recurring payments — the hosting each month and the domain each year. Both should be held in the business's own name, so the accounts stay with you.

SERVICE	WHAT IT IS FOR	COST	PER YEAR
Hosting Render	Serving the site, HTTPS padlock included. The paid plan keeps the site awake so it opens instantly for every visitor.	₦11,000 per month	₦132,000
Domain name	The web address itself, renewed yearly.	₦20,000 per year	₦20,000
Business email	A working <code>hello@</code> inbox on your own domain.	₦0 free plan	₦0
WhatsApp Business	Where every enquiry lands. The normal free app.	₦0	₦0
Visitor analytics	How many people visit, and how many tap through to WhatsApp.	₦0 free plan	₦0
Total	To keep the site online	₦11,000 / month	₦152,000 / year

Hosting and the domain bill in US dollars, converted here at roughly ₦1,550 to the dollar — the naira figure moves with the rate, so confirm at signup. Email and analytics have free plans this site fits inside comfortably; a Google Workspace mailbox, if you want one, is about ₦11,000 per person per month on top.

One free item worth more than any of the above: a **Google Business Profile**. It puts the firm on Google Maps for “landscaping Abuja”, and for a local trade it usually returns more enquiries than the website itself.

TO LAUNCH

- 01 Agree to proceed — the first 50% falls due
- 02 Confirm the domain name, and buy it — about ₦20,000
- 03 Open the hosting account — ₦11,000 a month, in the business's name
- 04 Send us the live WhatsApp number and email
- 05 We publish — the site goes live and the final 15% falls due
- 06 Send the logo and photographs — these can follow, and you can add them yourself

Steps 2 to 5 can be done in an afternoon once the details are to hand.
