— WORK · LANDSCAPING

Poolside garden

• ABUJA • 2025 • 7 WEEKS • ON MONTHLY CARE

— THE SITE AS WE FOUND IT

A raw pool shell in an open compound. Bare laterite to the boundary, no shade, and a fall running back toward the house — which meant every heavy rain put water where nobody wanted it.

The owners wanted somewhere to sit in the afternoon, not just a pool to look at. That turned a surfacing job into a garden: shade first, then planting to hold the ground, then paving set to move water away rather than across.

What we did

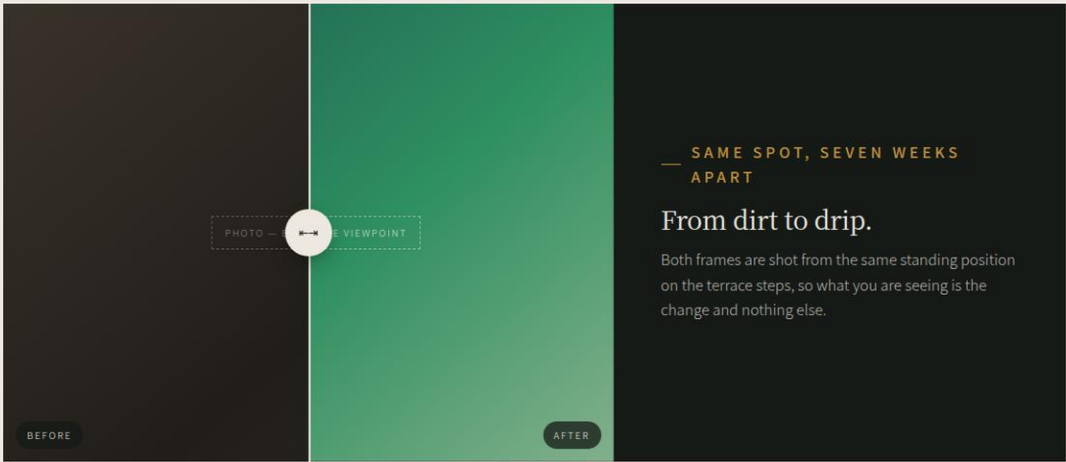

- Levels re-cut and falls set away from the house
- Sub-surface drainage to the compound boundary
- Paved pool surround, laid to fall, non-slip finish
- Royal palms set on a rhythm along the long edge
- Kerbed planting beds, soiled and mulched
- Turfing to the remaining open ground

— PROJECT FACTS

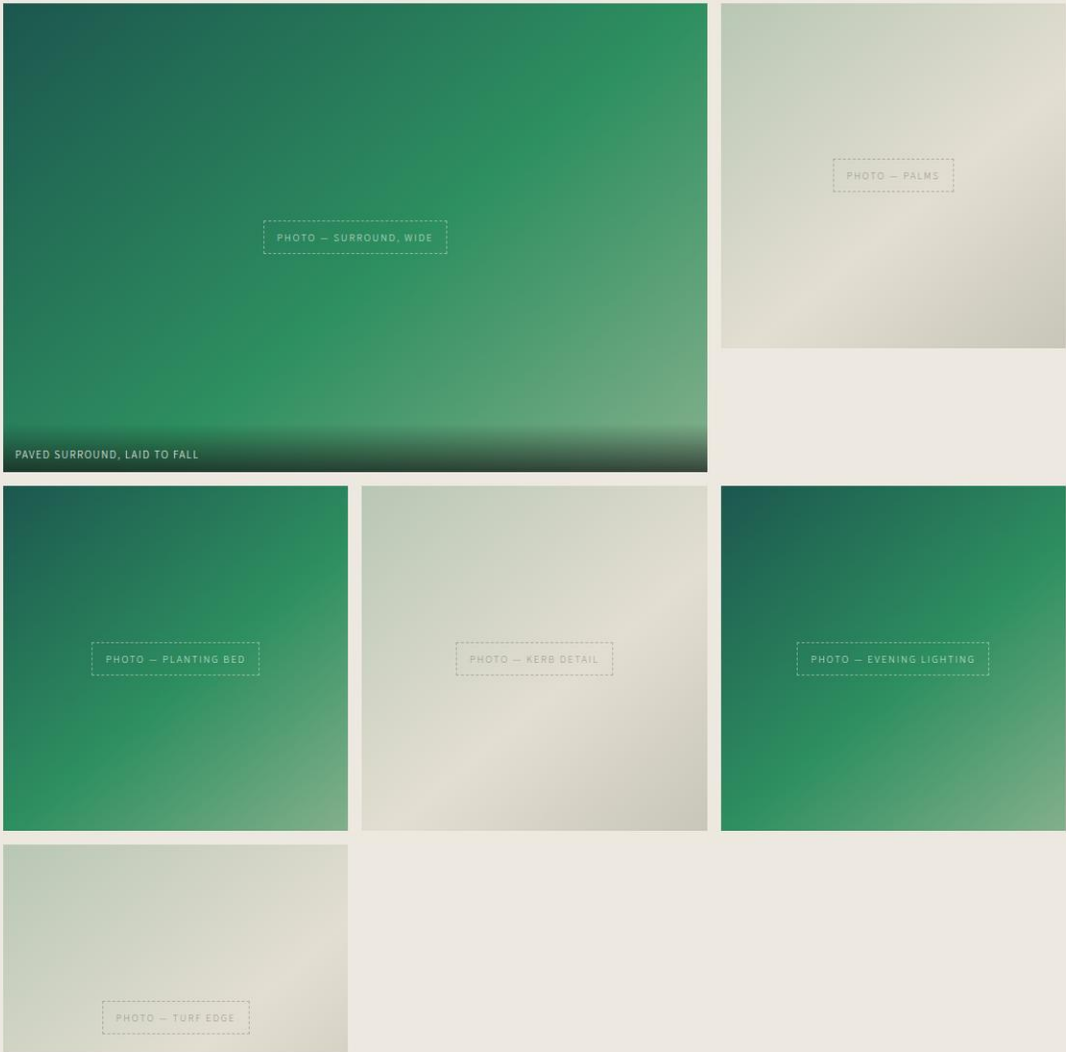

LOCATION	Abuja, FCT
TYPE	Private residence
SCOPE	Softscape, hardscape, drainage, lighting
BUILD	7 weeks
COMPLETED	2025
PLANTING	Royal palm, ixora, bougainvillea, turf
SINCE	Monthly care

— FLOWERS · SUPPLY & INSTALL

Colour, delivered and planted.

We supply flowering plants and put them in the ground the same visit — beds, borders, planters and massed colour for homes, offices, hotels and estates across Abuja.

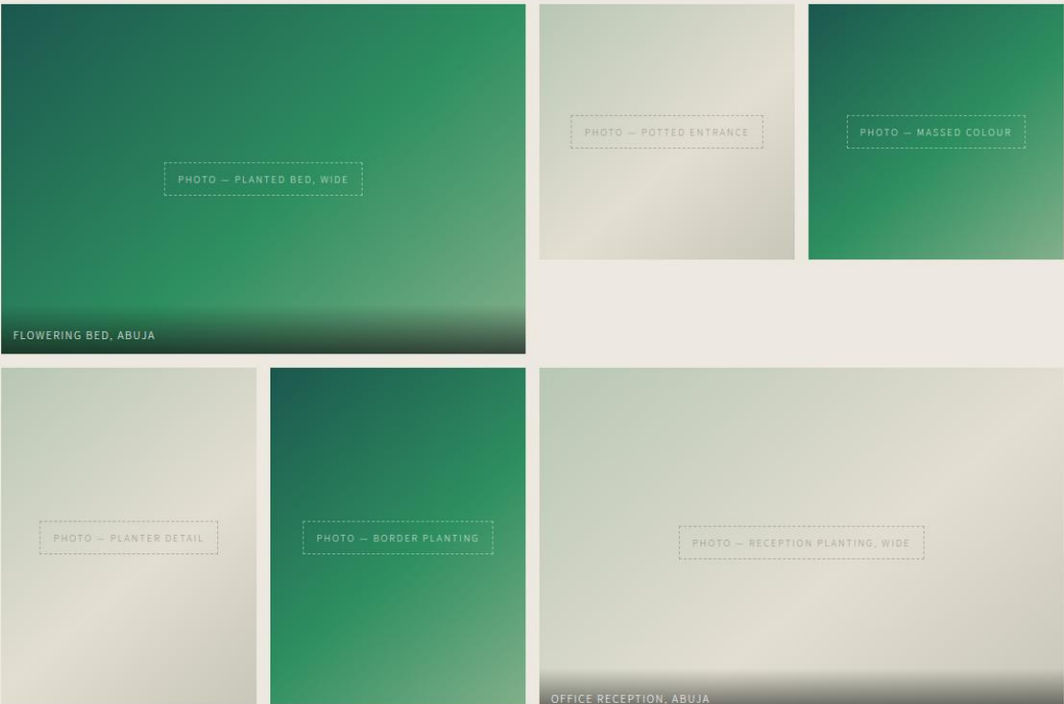

— WHAT WE SUPPLY

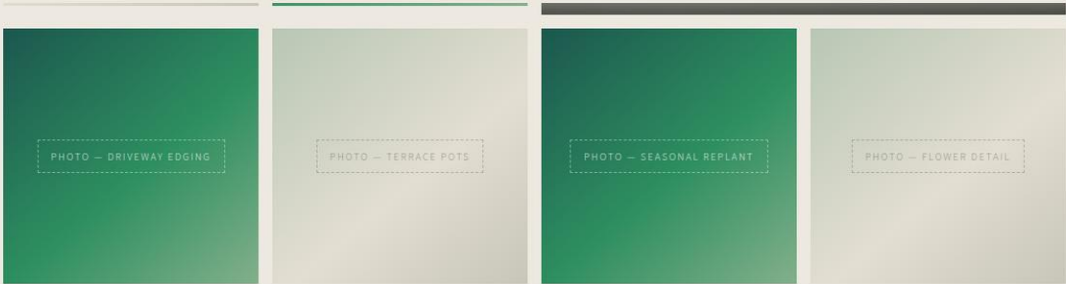

Grown, delivered, planted.

01 Beds & borders Flowering beds set out, soiled and planted — new, or a tired bed stripped and replanted.	02 Planters & pots Potted flowering plants for entrances, terraces, balconies and receptions. Pots supplied or yours filled.	03 Massed colour Edging, drifts and blocks of a single flower for driveways, frontages and event grounds.	04 Seasonal replanting Beds turned over when the colour tires — before harmattan and again after the rains.
--	--	---	---

— RECENT FLOWER WORK

The portfolio.

— TWO WAYS TO BUY

Once, or every season.

Both start the same way — we come and look at the space. What differs is what happens after the flowers are in.

OPTION A

One-off supply & install

You need colour now — a frontage before an event, a reception refreshed, a bed replanted. We quote the plants and the labour together, deliver and plant in one visit, and leave you a short care note.

OPTION B

Seasonal rotation

Flowers are a wasting asset in Abuja heat. On a rotation agreement we replant on a set schedule and keep the beds fed and watered between changes, so the frontage never has a dead month.

[SEE ROTATION & CARE PLANS](#)

— HOW IT WORKS

Four steps, one visit to start.

STEP 01

Visit & measure

We see the space, check sun and watering, and measure the beds or count the pots.

STEP 02

Selection

We name the flowers, quantities and pot sizes, with a price for plants and planting together.

STEP 03

Supply & install

Delivered and planted the same visit. Soil prepared, beds mulched, pots set where you want them.

STEP 04

Keep it flowering

A care note, and a rotation date if you want one — so the colour comes back before it goes.

BOOK A SITE VISIT

ALATU · HAUSA FOR BEAUTIFICATION

The garden you paid for,
twelve months a year.

Most gardens in Abuja are lost in the dry season, not the wet one. A fixed monthly visit costs a fraction of replanting — and your garden is never between gardeners.

VISIT

Monthly

One scheduled visit each month for compact gardens and courtyards.

- Mowing, edging & pruning
- Bed weeding & feeding
- Photo report after each visit

VISIT

Fortnightly

Twice-monthly care for larger grounds, or through the growing season.

- Everything in Monthly
- Irrigation checks & dry-season watering
- Seasonal replanting

CONTRACT

Grounds

Estates, schools, hotels and corporate grounds on an annual agreement.

- Assigned crew & supervisor
- Hardscape, lighting & water features
- Fixed schedule, annual renewal

Harmattan is the test

Between December and March, an unwatered garden goes backwards faster than it grew. Care plans front-load watering and shade in exactly those months.

You get pictures

A short photo report after every visit, so you can see the work whether or not you were home.

One crew, not a new one

The people who keep your garden are the people who built it. Nothing gets pruned wrong because nobody knew what it was.

Cancel on a month's notice

No long lock-in. The plan holds because the garden looks right, not because of a contract.

[ABOUT & PROCESS →](#)

THE STUDIO

Area 1, Abuja. Since 2016.

Japanese tranquility. Nigerian vibrancy. One garden.

The name carries the whole business in two languages: **landscaping**, the building of it, and **alatu** — Hausa for beautification — the keeping of it.

We take the restraint of a Japanese garden, space left empty on purpose and one stone placed well, and give it the colour and warmth people here actually want to sit in. We work for homeowners, estates, schools, hotels and corporate grounds, as main contractor or alongside your builder — small enough that the person who drew your garden is on site while it is built.
